

COVID-19 (Coronavirus) Precautions

In these uncertain times, our Driving School is preparing for the worst and hoping for the best. We have never gone through this in modern times but we need to take every step to ensure the safety and care of our students.

With that said until there is a Vaccine found for Covid-19, these are the steps that we are prepared to take:

When driving, we will be carrying hand sanitizer along with peroxide spray in our vehicles. We will ask each student to hand sanitize before getting behind the wheel. We will also spray and wipe down the controls of the car (steering wheel, turn signal, door handles) etc. As of right now, all Instructors will wear a mask and while we encourage that the student wears one as well, we are making it optional for the student to wear a mask. If there is a State mandate, the student will be required to wear one as well.

In extreme cases, we may ask each student to drive separately to ensure limited contact with each other. While I hope that many of these actions need not be taken, De Long's Driving School is hoping that by being proactive, we can lower the anxiety that is surely prevalent and keep practicing safety across the board to all aspects of our program.
